Agile-Ledger command cheat sheet

Plain-Markdown Scrum for Claude Code · read in the preview (IDs are links) · change via commands · `/guide` shows the map

Eight files in `Agile-Ledger/` • Ideas.md · Epic-Backlog.md · User-Stories.md · Bugs.md · Sprint.md · Sprints-History.md · Releases.md · Definitions.md • each opens with an overview table; every entry heading is its bare ID → stable `#us-014` anchor.

CAPTURE

`/idea`
raw idea → Ideas.md

`/bug`
raw bug → Bugs.md inbox

TRIAGE

`/triage`
ideas → epics/stories (+ suggested Draft stories)

`/triage-bug`
register bugs with ID, severity, priority

SHAPE THE BACKLOG

`/detail-us`
story → Ready (story + Gherkin AC + estimate + deps)

`/detail-epic`
detail every story in an epic

`/create-task`
optional FE/BE or sub-work split

`/find-bug`
read-only investigation: repro / expected / cause

`/refine`
INVEST · DoR · slice · deps · broken links (report)

PLAN & RUN THE SPRINT

`/plan-sprint`
Goal + pull Ready stories & top bugs within velocity

`/start-us`
dep-gate → In Progress, offer branch

`/start-bug`
start a fix, offer branch

`/review`
In Progress → In Review (verify, no PR)

`/pr`
In Review → In PR (PR body from ledger)

`/done-us`
In PR → Done (DoD + AC) → Increment

`/done-bug`
In PR → Fixed → Increment

`/close-sprint`
record velocity, return unfinished to backlog

INSPECT · READ-ONLY

`/board` *(/standup)*
current sprint snapshot

`/my-work` *[name]*
one dev's stories + blockers

`/status`
whole-product snapshot

`/roadmap`
epics by target version + rollups

`/guide`
command → file map + state summary

`/ledger-check`
audit drift + broken links

`/sync-main`
git main vs ledger: what merged

RELEASE

`/release` *[version]*
cut Major.Minor from the Increment

`/changelog`
notes: Added / Changed + Fixed (derived)

WORKSPACE · OPTIONAL MULTI-REPO

`/init-workspace`
set up Registry + Config

`/discover-repos`
find new repos: local + GitHub org

`/bootstrap-repo`
onboard one repo (optionally from git)

`/workspace-sync`
cross-repo “what changed while I was away”

`/workspace-status`
dashboard across managed repos

CONVENTIONS

`branch`
us-014-slug · bug-014-slug (lowercase, no type)

`commit`
feat(scope): … (US-014) · fix(…): … (BUG-014)

`PR title`
… [US-014] — the ID is the join key

`axes`
Estimate = Fibonacci pts · Priority 🔴🟡🟢 · git opt-in

31 commands + /standup alias · three skills · no database · Agile-Ledger v1.7
